

Data Analytics Maturity Assessment

Our Approach

Our Data Analytics Maturity Assessment is a fixed-scope, repeatable evaluation of your analytics maturity across your Microsoft tenant. We pair an automated tenant scan with structured stakeholder interviews, scored on a 1–5 model aligned to Microsoft's Fabric adoption roadmap.

Common Challenges

- No objective view of analytics maturity across the tenant
- Reporting sprawl and duplicated semantic models
- No source control or CI/CD for analytics content
- Gaps in governance, metadata, and documentation
- Unclear readiness for Copilot and AI agents

Benefits

- ✓ Objective baseline scored on real tenant evidence, not opinion
- ✓ Weighted maturity score and dimension-by-dimension heatmap
- ✓ Prioritized, actionable roadmap to higher maturity
- ✓ Readiness check for Copilot and AI / agent analytics
- ✓ Repeatable benchmark to track progress on every re-run
- ✓ Coverage across nine dimensions, from modeling to adoption
