

Purview Assurance

Our Approach

Purview Assurance gives you a Purview expert in your corner every month, without the cost of a managed service.

We keep the platform stable, review your DLP, Information Protection, and DSPM for AI activity, troubleshoot the questions your team gets, and support you as you enable new features.

Common Challenges

- Purview is licensed and piloted, but no one owns it day to day.
- DLP alerts and label overrides go unreviewed.
- Policies drift after go-live; simulations never get promoted to enforce.
- The helpdesk can't answer "why was this blocked, labeled, or deleted?"
- A Copilot rollout exposes oversharing that no one is tracking.
- The value isn't proven enough yet to justify a full managed service.

Benefits

- ✓ Platform stability — a monthly health check of policies, scopes, roles, and Microsoft changes.
- ✓ Faster answers to troubleshooting questions from someone who knows your tenant.
- ✓ One bounded improvement per module, every month.
- ✓ A bridge while your team ramps up, or a path to fully managed.

What's Included

- Platform stability check: policy errors, scope drift, admin roles.
- Troubleshooting for the questions your team receives.
- Feature enablement: one bounded improvement per module monthly.
- Module diagnostics and remediation across DLP, Information Protection, DSPM for AI, Endpoint DLP, Insider Risk, and Data Lifecycle.
- Monthly one-page scorecard with a 30-minute review call.
- Flex bank of hours for reactive requests.

Service Options

- **Baseline** — Information Protection or DLP, plus standing inclusions.
- **Moderate** — Information Protection and DLP.
- **Advanced** — adds DSPM for AI, Endpoint DLP, and Insider Risk; Data Lifecycle optional.
- **Starting at \$1,900 per month** — 3-month minimum. Hours are scoped in the SOW, delivered remotely over the course of each month, and do not roll over.

Why ivision?

People

Microsoft-certified security and compliance specialists who know Purview in production, not just in the lab.

Process

A repeatable monthly cadence — observe, act, report — with bounded remediation so scope never surprises you.

Technology

Native command of Purview, Defender, Entra, and Microsoft 365 Copilot, governed as one platform.
