

Security Risk Assessment

Comprehensive evaluation of an organization's cybersecurity posture.

Our Approach

- Combination of interviews, documentation review, and technical assessment
- Utilize industry standard frameworks (NIST, ISO 27001, CIS controls)
- Risk assessment based on threat modeling and impact analysis

Common Challenge

- Compliance and regulatory requirements
- Inadequate security controls and policies
- Identify Assets and Data Sensitivity
- Third Party and Supply Chain Risk Management

Benefits

- Identify vulnerabilities, assess risk, and provide recommendations for improvement
- Provide a clear picture of the organization's cybersecurity posture
- Offers actionable recommendations to improve overall security posture

What's Included

- Documentation review for analysis and risk prioritization
- Virtual or on-site interview workshops with key subject matter experts
- Data flow diagrams
- Roadmap for implementing recommendations

Service Options

- Baseline Assessment – High level risk review across key domains
- Comprehensive Risk Assessment – Deep-dive assessment aligned to NIST CSF
- Targeted Risk Assessment – Focused evaluation ideal for specific regulatory or business concerns

Why ivision?

People

We promote productivity and collaboration through proactive management, clear expectations, and technical expertise.

Process

Our structured and repeatable approach is based on strategic methodology that allows you to capitalize on opportunity.

Technology

Our proven partner ecosystem empowers us to deliver the most innovative solutions for your technology needs.
