

Threat Model

Identify and assign degrees of risks to the threats of your attack surface to understand their impact.

Our Approach

- Initial Consultation
- Define Security Attributes
- Identify the Attacker Vantage Points
- Enumerate the Exclusions
- Create Threat Model Diagrams
- Enumerate Threats, Determine Risk, and Likelihood
- Validate Threat Mitigation

Common Challenge

- Identify security weaknesses early
- Unknown points of risk or exposure
- Lack of prioritized threat vectors
- Systems and infrastructures frequently changing and updating, providing for new points of exposure.
- Address compliance and regulatory requirements
- Fixing vulnerabilities is far less expensive than when they are exploited by a threat actor

Benefits

- ✓ Threat models assign varying degrees of risk to each identified threat, guiding attention to the highest risk items
- ✓ Facilitates long-term security planning
- ✓ Stronger security posture
- ✓ Increased resilience against cyber threats
- ✓ Faster Incident Response

What's Included

- Documentation review for threat analysis and prioritization
- Virtual or on-site interview workshops with key subject matter experts
- Data flow diagrams
- Executive readout and presentation of results

Service Options

- On-Site Interviews

Why iVision?

People

We promote productivity and collaboration through proactive management, clear expectations, and technical expertise.

Process

Our structured and repeatable approach is based on strategic methodology that allows you to capitalize on opportunity.

Technology

Our proven partner ecosystem empowers us to deliver the most innovative solutions for your technology needs.
