

Security-Driven Network Architecture & Design

Protect your critical assets through strategic network architecture.

Our Approach

We provide support from start to finish, helping you plan, implement and optimize to deliver security solutions that best fits your evolving business needs.

Common Challenges

- Network architectures based on open communications and trusted assets do not protect against modern threats
- Lack of visibility into network communications including authorized and unauthorized business traffic
- Challenges securing remote workers and mobile devices while protecting data confidentiality and integrity
- Ensuring compliance with regulatory and industry specific regulations including data protection and sovereignty laws is unsuccessful

What's Included

- ✓ Network security architecture assessment to identify cybersecurity risks inherent to design models and control gaps
- ✓ Network design, segmentation, zoning and isolation of sensitive assets (Systems, Data, Services) to limit impact of potential breaches
- ✓ Advanced defense design, including next gen firewall, IDPS and SASE.
- ✓ Compliance alignment with regulatory and industry regulations such as PCI, Cybersecurity Maturity Model Certification (CMMC) and cybersecurity framework alignment.

Service Options

- Networks security assessments and audits
- Secure remote access implementation
- Network security controls and governance development
- Managed network security services

Why ivision?

People

We promote productivity and collaboration through proactive management, clear expectations and technical expertise.

Process

Our structured and repeatable approach is based on strategic methodology that allows you to capitalize on opportunity.

Technology

Our proven partner ecosystem empowers us to deliver the most innovative solutions for your technology needs.

Trusted Partners
