

Full Coverage End Point Security

Combat malware, ransomware and insider threats across all devices.

Our Approach

We provide support from start to finish, helping you plan, implement and optimize to deliver security solutions that best fits your evolving business needs.

Common Challenges

- Addressing vulnerabilities across a wide range of devices
- Increasing sophistication of malware, zero-day threats and ransomware
- Shadow IT and BYOD introduce security management challenges with untrusted devices
- Insider threats from employees or contractors
- Industry specific compliance regulations and data protection laws

Service Options

- End point protection solution deployment
- Patch management process implementation
- End point security policy development
- Managed services offerings for vulnerability management, patching and managed detection and response

What's Included

- Selection and implementation of End point protection solutions
- Deployment of End Point Detection and Response (EDR) solutions to provide advanced threat detection, incident response capabilities and forensic analysis
- Establish patch management strategies based on critical business risks
- Development of end point security policies, controls and configuration guidelines

Why ivision?

People

We promote productivity and collaboration through proactive management, clear expectations and technical expertise.

Process
