

# Managed Vulnerability For Risk Reduction

**Proactively identify and remediate vulnerabilities in your systems.**

## Our Approach

We provide support from start to finish, helping you plan, implement and optimize to deliver security solutions that best fits your evolving business needs.

## Common Challenges

- Tools and experience required to assess vulnerabilities from a business risk-based outcome
- Lack of visibility into the IT infrastructure, making it difficult to assess vulnerabilities across all systems
- Limited IT resources and expertise to manage growing number of vulnerabilities
- Applying security patches across various systems can be a complex and time-consuming process

## What's Included

- ✓ Vulnerability assessment and risk prioritization based on business risk
- ✓ Remediation guidance required to resolve vulnerabilities
- ✓ Patch management of infrastructure and cloud assets
- ✓ Vulnerability reporting and analytics
- ✓ Continuous vulnerability scanning using automated tool sets
- ✓ Advance threat intelligence feeds included in the decision-making process

## Service Options

---

- Vulnerability Management Database used for collection, analysis and prioritization of risks
- Dedicated patching team
- Managed vulnerability scanner
- Per asset pricing

## Why ivision?

---

### People

We promote productivity and collaboration through proactive management, clear expectations and technical expertise.

### Process

Our structured and repeatable approach is based on strategic methodology that allows you to capitalize on opportunity.

### Technology

Our proven partner ecosystem empowers us to deliver the most innovative solutions for your technology needs.
