

# Product Security Engineering

## (DevSecOps)

**Preserve velocity, cost and time by building security into your software.**

### Our Approach

We provide support from start to finish, helping you plan, implement and optimize to deliver security solutions that best fits your evolving business needs.

### Common Challenges

- Requirement to develop greenfield software quickly
- Must meet security standards of central security group
- Maintain development velocity without introducing security vulnerabilities
- Build security credibility with engineering teams
- Addresses scalability of security personnel and process issues

### What's Included

- ✓ Security activities mapped to SDLC activities
- ✓ Security champion team training/creation
- ✓ Active support – virtual team or train in-house
- ✓ Threat modeling and security architecture reviews and training
- ✓ Strategic external validation/penetration testing

## Service Options

- Security champion team design and implementation
- Individual product security expert role
- Outsourced Active Support/SSG
- Full SDLC support

## Why ivision?

### People

We promote productivity and collaboration through proactive management, clear expectations and technical expertise.

### Process
