

Next Generation Cloud Firewall & Security

Use the power of the cloud to secure any user, any application, anywhere.

Our Approach

Our Next Generation Cloud Firewall and Security solution provides comprehensive protection with SASE (Secure Access Service Edge) principles. With a cloud-based firewall, it defends against cyber threats and ensures optimized network performance. Centralized management and real-time visibility offer efficient monitoring and policy enforcement.

Common Challenges

- Distributed workforce
- Cloud adoption
- Data privacy concerns
- Network complexity
- Lack of visibility
- Inadequate security measures
- User experience
- Device proliferation
- Legacy WAN architecture
- Limited IT resources

Benefits

- ✓ Improved security posture
- ✓ Simplified management
- ✓ Enhanced user experience
- ✓ Zero Trust architecture
- ✓ Scalability
- ✓ Global reach
- ✓ Reduced complexity
- ✓ Threat intelligence integration
- ✓ Rapid deployment
- ✓ Future proofing

What's Included

- Selection and implementation of the following Next Generation Cloud Firewall and Security components:
 - Secure Internet Gateway (SIG) integration
 - Cloud connectivity
 - SaaS application optimization (O365, Salesforce, etc.)
 - User VPN replacement
- Defined business objectives and requirements gathering
- Vendor feature comparison
- Enhanced security policy
- Identity integration
- Creation of an Enterprise Security Policy (i.e., iPosturing, 2FA, content filtering and access control)

Service Options

- Supported by ivision managed services
- Application and Network Readiness Assessment
- CASB and DLP integration
- Zero Trust Methodology and IDP integration
- Digital experience
