

SD-WAN

Rethink your approach to connectivity and cost-effectively shift to an agile network solution.

Our Approach

Software-Defined Wide Area Networking (SD-WAN) offers enhanced network agility, cost efficiency and improved performance. SD-WAN simplifies network management through centralized control, enabling organizations to adapt quickly to changing business needs while minimizing operational complexity.

Common Challenges

- Network congestion and latency
- Application performance
- Security and compliance
- Complex network management
- High circuit costs
- Limited scalability
- Cloud and SaaS access
- Lack of visibility

Benefits

- ✓ Network performance optimization
- ✓ Enhanced security
- ✓ Simplified management
- ✓ Cost efficiency
- ✓ Scalability and flexibility
- ✓ Improved user experience
- ✓ Cloud and SaaS optimization
- ✓ Business continuity
- ✓ Compliance and governance

What's Included

- Architecture and design of your SD-WAN network
- Discussion and review of existing SD-WAN vendors and functionality available
- Application and cloud performance acceleration policy
- Integration and migration for new SD-WAN network, including circuits, hardware and policy
- Branch / remote site network roll out

Service Options

- Supported by ivision managed services
- Integration with a SIG (Secure Internet Gateway)
- CASB and DLP integration
- Integration with legacy network
- Digital experience and monitoring
- Runbooks for new site deployment and common management tasks

Why ivision?

People

We promote productivity and collaboration through proactive management, clear expectations and technical expertise.

Process

Our structured and repeatable approach is based on strategic methodology that allows you to capitalize on opportunity.

Technology

Our proven partner ecosystem empowers us to deliver the most innovative solutions for your technology needs.
