

# Unified Infrastructure

**Simplify your architecture with a high-performance solution that's easy to manage.**

## Our Approach

Unified Infrastructure provides organizations a streamlined and integrated approach to managing their IT resources. By consolidating servers, storage, networking and management tools into a single cohesive architecture, it simplifies operations, reduces complexity and enhances efficiency.

## Common Challenges

- Technology silos
- Limited visibility
- High support costs
- End of life hardware
- Agility to meet changing requirements
- Frustrating point solutions
- Poor application performance
- Exponential growth of data

## Benefits

- ✓ Infrastructure and tool consolidation
- ✓ Simplified management
- ✓ Quick to deploy
- ✓ Easy to scale
- ✓ Better visibility
- ✓ High performance
- ✓ Single point of management
- ✓ Easy, single vendor support

## What's Included

---

- Vendor comparison and procurement
- Design and architecture
- Implementation and testing
- Data migration
- Performance analysis and sizing
- Lifecycle management
- Security and compliance alignment to business requirements

## Service Options

---

- Fully supported by ivision managed services
- Converged Infrastructure (FlexPod / FlashStack)
- Hyper Converged Infrastructure (HCI)
- VMware virtualization
- Remediation and managed services

## Strategic Partners

---

**NUTANIX**

**vmware**

## Why ivision?

---

### People

We promote productivity and collaboration through proactive management, clear expectations and technical expertise.

### Process

Our structured and repeatable approach is based on strategic methodology that allows you to capitalize on opportunity.

### Technology

Our proven partner ecosystem empowers us to deliver the most innovative solutions for your technology needs.
