AXONIUS

Better Together: ivision & Axonius

Providing Comprehensive Asset Visibility

ivision is excited to offer the full scope of the Axonius Platform to our customers including:

- **Cybersecurity Asset Management**
- **SaaS Management**
- **Software Management**
- **Enforcement Center**

A recognized leader in Cyber Asset Attack Surface Management (CAASM) and SaaS Security Posture Management (SSPM), Axonius is the only company to provide a unified, comprehensive solution that addresses both markets.

The Axonius Platform

THE SYSTEM OF RECORD FOR ALL DIGITAL INFRASTRUCTURE

With over 1,000 pre-built integrations, the Axonius Platform automatically delivers a comprehensive inventory of all assets, including users, devices, cloud instances, software, SaaS apps, and more, uncovers security gaps, and automates response actions.

TOTAL VISIBILITY

Axonius identifies all assets, provides context, and reveals important connections.

ACTIONABLE ANSWERS

Query your unified, correlated data set, identify security issues, and make better risk-based decisions.

AUTOMATE ACTION

Analyze asset issues, then automate remediation to drive down risk and reduce your attack surface.

THE AXONIUS APPROACH

- Agentless deployment
- Over 1,000 pre-built integrations
- Connects to solutions using adapters
- Deploys in hours

KEY AXONIUS USE CASES

- Cyber Asset Attack Surface Management
- SaaS Security Posture Management
- Vulnerability Management
- Software Management
